**Supplier of flexible packaging  
material**

Turnover:  
€976m

Countries:  
Austria, Denmark, Poland and  
United Kingdom

## Flexibility is the key for Constantia

**Constantia Teich forms part of Constantia Flexibles, a segment of publicly-listed Constantia Packaging GmbH. This group provides its customers around the globe with a range of innovative packaging solutions in the food, pharmaceutical and beverages sectors.**

AxPact's Austrian member, FWI Information Technology, was selected to provide Microsoft Dynamics AX for local subsidiaries in Denmark, Poland and the UK of the Dairy & Food Division of Constantia Flexibles in Austria.

The ability to handle the whole project within the AxPact group was a key reason for Constantia Teich selecting FWI as their long-term Microsoft Dynamics AX partner. **"FWI already has a lot of international experience in the printing and packaging sector, outstanding skills and a very good reputation in our industry"**, commented Gabriele Schuh, Head of Shared Service Center AX at Constantia Teich.

A new ERP system became necessary in order to flexibly meet the associated requirements of the expanding company. FWI was able to unite wide-ranging requirements within the group in a standardised and uniform ERP solution and, thereby, covering all of the structures and processes, such as different local languages and, in part, varied local business environments.

**"We have benefited greatly from the best-practice experience of FWI, just as FWI has also been able to learn from us, with the result that their industry solution "FWI PRINT & PACKAGING" is now setting new standards for the entire industry,"** added Gabriele Schuh.

Following the centralization of the application, the system, including the "FWI PRINT & PACKAGING" module, will be rolled out at the Constantia Flexibles sites. Due to the positive experiences to date, the current strategic route with FWI will be continued in the future.
