

Advanced Import Costing for D365 Finance & Operations by DIS

Legal Compliance and Adoption of Best Practices

Companies use ERP systems to automate business processes. However, often experience difficulties in areas such as gaining valuable insights from business applications, effective data migration from 3rd party software applications and lack of templates and blueprints that fulfil the needs of local wholesale, retail and service provisioning businesses.

The choice of the right ERP for a company is crucial. Dynamics 365 for Finance and Operations helps businesses adapt quickly to changing market demands and drive business growth. They can elevate their financial performance, run smarter with connected operations, automate and streamline their supply chain etc.

DIS develops Advanced Import Costing by utilizing the local market knowledge and business best practices that ensure compliance with local legal requirements and can boost the customer's competitive advantage. Advanced Import Costing helps organizations manage, track and gain visibility on delivery costs and related expenses associated with import shipments of their products.
